Response to Amendment

1. This Office action is responsive to applicant's amendment filed on July 23, 2003.

Claims 1-3 and 5-6 are pending. Claims 5 and 7-11 have been canceled.

2. After further review, the following deficiencies have been found in the instant application.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the **steps** of the method claims must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The language "wherein in connection with said buffering, ..., with respect to core circuitry of said digital circuitry" in claims 1 and 2 does not seem to have any antecedent basis in the written description.

Art Unit: 2133

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4.1 Claims 1-3 and 5-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The language “wherein in connection with said buffering, ..., with respect to core circuitry of said digital circuitry” in claims 1 and 2, is unclear and confusing. It is not clear as to how the conversion is being performed, and as to what is being converted to what.

4.2 Furthermore, the claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

4.3 Due to their ambiguities, the claims will not be further analyzed on the merits since the Examiner has been unable to determine the scope of the claims.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Emmanuel L. Moise whose telephone number is (703)305-9763. The examiner can normally be reached on Monday - Friday from 08:30 a.m. - 5:00 p.m.
